

Muhammad Qasim

Full-Stack Developer • Flutter Developer • AI Enthusiast

Lahore, Pakistan • mqasim91310@gmail.com • +92 320 658 9259 • github.com/mqasim91310 • linkedin.com/in/muhammad-qasim-6725242a7

PROFESSIONAL SUMMARY

Motivated BS Computer Science student at Riphah International University (6th Semester) with hands-on experience building full-stack web applications, mobile apps, DSA-driven C++ systems, and interactive games. Proficient in Java, C++, Assembly Language (x86/8086), and cross-platform development using Flutter and Unity. Actively seeking a Software Engineering internship to apply academic knowledge in a real-world engineering environment.

EDUCATION

Bachelor of Science in Computer Science (BSCS)

Riphah International University, Lahore, Pakistan | Expected Graduation: June 2027 | Currently in 6th Semester

Relevant coursework: Data Structures & Algorithms, Object-Oriented Programming, Database Systems, Software Engineering, Computer Organization & Assembly Language, Discrete Mathematics.

EXPERIENCE

Frontend Development Intern • Decode Labs

Remote / Virtual | 15 May 2026 – 15 June 2026

- Learning-focused internship working on assigned frontend projects, completing milestones, and participating in mentor-led sessions to gain hands-on industry experience.

FEATURED PROJECTS

AI Kabir Developers — Real Estate Web Application

React.js, Node.js, MySQL

- Full-stack real estate web app with live property listings, user registration, multi-filter search, and an admin dashboard; normalized MySQL schema improved query efficiency by roughly 25%. Deployed live.

Street Rush — Endless Runner Mobile Game

Unity 6, C#

- Complete endless-runner game with procedural obstacle generation, progressive difficulty scaling, object-pooled rendering for a stable 60 FPS on mobile, and a persistent local high-score system.

Brew & Bless Coffee Shop — Mobile Application

Flutter, Dart, Firebase

- Cross-platform ordering app with real-time Firestore sync for menu and orders, custom Flutter widgets, and secure Firebase Authentication.

Hotel Management System

C++, DSA (Trees, Hash Maps, File I/O)

- Full check-in/check-out and billing system using a hash map for constant-time room lookups, tree-based record organization, and persistent file I/O for guest data.

OS Kernel Simulation with CPU Scheduling

JavaFX, Java

- Visual simulator for kernel-level process scheduling implementing FCFS, SJF, and Round Robin algorithms against a shared process model.

TECHNICAL SKILLS

Programming Languages	Java, C++, Dart, C# (Unity), x86/8086 Assembly
Web Development	HTML5, CSS3, JavaScript, React.js, Node.js
Mobile & Game Dev	Flutter, Unity Engine
Databases	MySQL, PostgreSQL, Firebase
Tools	Git, GitHub, VS Code, Android Studio
Coursework	DSA, OOP, Database Systems, Software Engineering, Computer Organization, Discrete Mathematics

ACADEMIC JOURNEY

Semester 1-2 (Spring-Fall 2024): Programming Foundations, Digital Logic & Design — built an OOP-based Airline Reservation System (C++), a Restaurant Management System (Java), and a 4-bit password lock circuit.

Semester 3-4 (Spring-Fall 2025): Data Structures, Databases, Assembly, Web & Software Engineering — built a DSA-driven Hotel Management System, a MySQL ticket-booking system, and the full-stack AI Kabir Developers web app.

Semester 5 (Spring 2026): Human-Computer Interaction, Mobile App Development, Game Programming, Operating Systems — shipped two Flutter apps (Brew & Bless, DeenEase), the Street Rush Unity game, and an OS scheduling simulator.

Semester 6 — In Progress (Fall 2026): Advanced coursework in Artificial Intelligence, Advanced Database Systems, and Mobile App Development — currently building the full Khidmat application and laying the groundwork for a home-tutor LMS platform.

CERTIFICATIONS

C++ Essentials 2, JavaScript Essentials 1 & 2, and Operating Systems Basics (Cisco Networking Academy) • Master Data Analysis & EDA for Machine Learning Projects, ChatGPT Masterclass, and Ethically Hack the Planet Parts 1 & 2 (Udemy) • Get Started with SQL Analytics and BI on Databricks (Databricks) • Excel Automation using ChatGPT (Verified Certificate)

INTERESTS

Pulling apart new frameworks and AI tools to see what they're actually good for, tinkering with small Flutter and game side-projects, and studying how production codebases are structured beyond textbook examples.
