PROFESSIONAL SUMMARY

Motivated BS Computer Science student at Riphah International University (5th Semester) with hands-on experience building full-stack web applications, mobile apps, DSA-driven C++ systems, and interactive games. Proficient in Java, C++, Assembly Language (x86/8086), and cross-platform development using Flutter and Unity. Actively seeking a Software Engineering internship to apply academic knowledge in a real-world engineering environment.

EDUCATION

Bachelor of Science in Computer Science (BSCS)

Riphah International University, Lahore, Pakistan | Expected Graduation: June 2027 | Currently in 5th Semester

FEATURED PROJECTS

Al Kabir Developers — Real Estate Web Application

React.js, Node.js, MySQL

- Engineered a full-stack real estate web app with live property listings, user registration, and an admin dashboard; normalized MySQL schema improved query efficiency by 25%.

Street Rush — Endless Runner Mobile Game

Unity Engine, C#

- Shipped a complete endless-runner game with procedural obstacle generation, scoring, progressive difficulty scaling, and object-pooled rendering.

Brew & Bless Coffee Shop — Mobile Application

Flutter, Dart, Firebase

- Built a cross-platform ordering app with real-time Firestore sync, custom UI widgets, and secure Firebase Authentication.

Flight Reservation System

C++, Linked Lists, Queues

- Console-based reservation system using linked lists for seat management, queues for waitlists, and merge sort for flight listings.

Restaurant Management System

Java (OOP), MySQL/PostgreSQL

- Console application applying encapsulation, inheritance, and polymorphism with CRUD-backed order management and automated billing.

TECHNICAL SKILLS

Programming Languages	Java, C++, Dart, C# (Unity), x86/8086 Assembly
Web Development	HTML5, CSS3, JavaScript, React.js, Node.js
Mobile & Game Dev	Flutter, Unity Engine
Databases	MySQL, PostgreSQL, Firebase
Tools	Git, GitHub, VS Code, Android Studio

Coursework

DSA, OOP, Database Systems, Software Engineering, Computer Organization,
Discrete Mathematics

ACADEMIC JOURNEY

Semester 1-2 (2022-2023): Foundations of Programming, OOP & Data Structures — built a console calculator and a Java Library Management System.

Semester 3-4 (2023-2024): Web & Database Fundamentals, Operating Systems — built an e-commerce frontend and a C-based simple shell.

Semester 5 (2024-2025): Computer Networks, Software Engineering, Theory of Automata — developed a Python socket-based chat application.

Upcoming: Artificial Intelligence, Flutter, Cloud Computing (AWS), Big Data Analytics, Capstone Project.

INTERESTS

Exploring new technologies, contributing to open-source projects, participating in hackathons, and continuous learning across the modern software stack.
